

Innovative Vision
Reliable Security

The new frontier of **smart video** **surveillance**

The new **Easydom Eye** line is the ideal solution for smart video surveillance: compact cameras that are easy to install and integrated with advanced artificial intelligence features.

Modern design and cutting-edge technology guarantee total **security and control**, always at your fingertips.

TECHNOLOGY AND DESIGN AT THE SERVICE OF YOUR SAFETY

The range includes **indoor and outdoor cameras** with metal bodies and **IP66** certification, resistant to water and vandalism, with resolutions up to **8 MP 4K** for sharp, detailed images. Integrated AI functions enable **intelligent face detection, humanoid recognition**, and other advanced analyses for even more effective protection.

The line is completed by **NVR recorders**, available in both traditional and **All-in-One models with integrated screens**, for immediate and simplified control of the entire system.

Reliability even in the most extreme conditions

Easydom Eye outdoor cameras have a vandal-proof metal casing that is resistant to weathering and impact, ensuring continuous protection over time.

Thanks to its **IP66 protection rating**, it is completely shielded against dust and resistant to powerful water jets, ensuring reliable performance even in the most difficult weather conditions.

ADVANCED SECURITY, EASY TO INSTALL

Thanks to **IP technology**, Easydom Eye cameras guarantee advanced connectivity and native integration into network systems, allowing secure and always accessible control. **On-board PoE power** simplifies installation, eliminating complex cabling and ensuring a neat and tidy system.

Integrated audio with **ambient listening** opens up new possibilities for monitoring and communication, making control even more immediate and effective.

In addition, advanced **Artificial Intelligence** features – such as intelligent face detection and human silhouette recognition – offer a higher level of security, reducing false alarms and improving system reliability.

The **Intelligent** Video Surveillance Center

Easydom Eye NVRs are the heart of the IP video surveillance system, ensuring high-performance **recording, management, and storage** of video streams with operational flexibility.

The intelligent **Face Detection and Human Detection** features enable the recognition of faces and human movements, reducing false alarms and improving monitoring accuracy.

The Easydom Eye NVR series supports configurations of up to 36 channels, offering scalable solutions for homes, offices, and large facilities. All models feature **integrated PoE connectivity and support SATA** interfaces for the installation of hard disks up to 4TB.

Finally, **automatic camera detection** simplifies configuration and ensures a system that is always efficient and immediately operational.

INTEGRATED EFFICIENCY IN A SINGLE DEVICE

The All-in-One NVR stands out for its **integrated 11.6" high-definition display**, which allows you to monitor camera images in real time without the need for external devices. All operations, from configuration to viewing recordings, can be managed **directly from the screen**, making the user experience simple and immediate.

Its compact design and the possibility of wall or countertop installation make it ideal for homes, offices, and professional environments where a **complete and autonomous video surveillance solution is desired**.

Monitor, record, protect – All from the Easydom Eye app

The **Easydom Eye** app is the smart control center for your video surveillance system.

Adding cameras is **simple and immediate**: thanks to the guided procedure, it only takes a few steps to get them up and running and connected to the app.

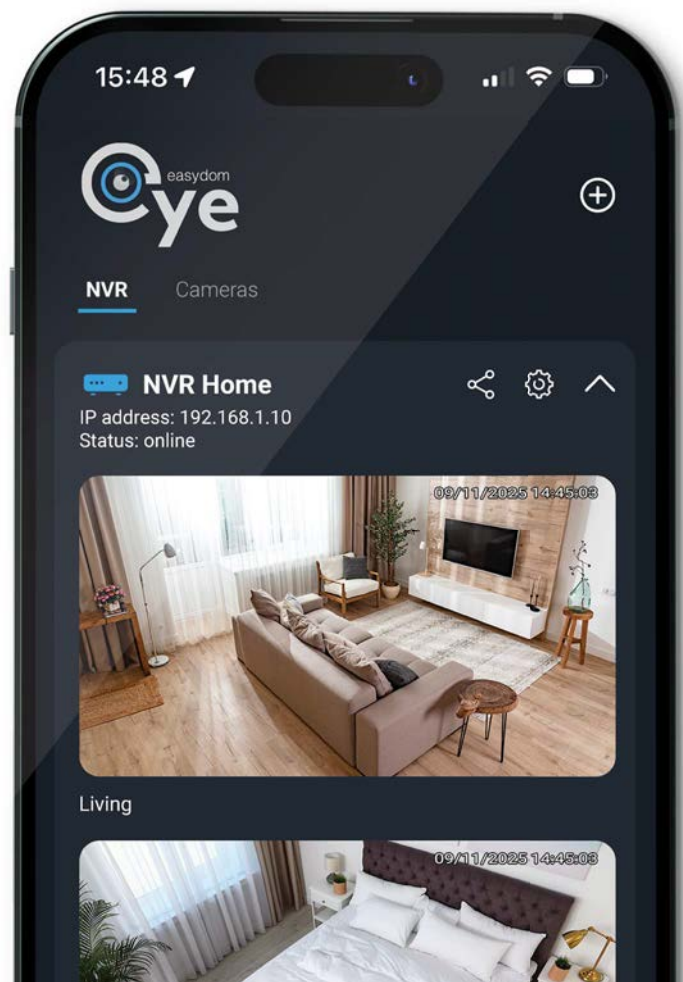

You can **monitor your premises in real time**, even remotely, with secure and immediate access.

From the intuitive interface, you can view video streams, take **screenshots, record clips**, and manage alarms directly from your smartphone or tablet.

A single, reliable platform gives you full control over security, wherever you are

COMING SOON

REVIEW, ANALYZE, PROTECT: TOTAL CONTROL OF RECORDINGS

With the Easydom Eye app, reviewing recordings is quick and easy. You can **select the date and time** to view videos from previous days or directly access **events automatically detected** by the system thanks to the motion detection, face detection, and human detection functions.

During playback, you can **take screenshots** or **extract portions of videos** to save only the most important sequences, ensuring precise and complete control of every recorded moment.

24-hour protection for residential and professional spaces

The Easydom Eye video surveillance system is designed to ensure **constant security and professional control** in any context, from small shops to offices, to shared spaces such as condominiums or companies.

The Easydom Eye series NVRs offer **continuous 24/7 recording**, ensuring that every event is securely stored and always available for consultation..

EASYDOM EYE IS **THE IDEAL SOLUTION** FOR SHOPS, OFFICES, AND APARTMENT BUILDINGS.

Directly connectable to a monitor or TV (in the case of the NVR MINI model), they allow you to **view, search, and play back** videos quickly and easily, with the option to cut portions of videos or save clips of interest.

The intuitive interface and **smart video analysis features** – such as face, motion, and human presence detection – make Easydom Eye a comprehensive and scalable solution, perfect for those who want continuous, accurate security tailored to every environment.

EYE DISPLAY INDOOR WI-FI

THE CAMERA THAT COMMUNICATES

The Eye Display Indoor Wi-Fi combines video surveillance and communication in a single device.

The integrated 2.8" IPS HD display allows you to monitor what is happening in real time, while two-way **video calling** allows you to interact with those in the room.

Compact design, versatile installation, and **Wi-Fi + Bluetooth** connectivity for smart, intuitive security that's always at your fingertips.

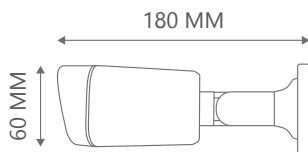

Easydom Eye Smart: intelligent video surveillance for your home

Easydom Eye Smart cameras combine **compact design, advanced technology, and ease of use** to ensure continuous monitoring of your home. Made with quality materials and equipped with Wi-Fi connectivity, they easily integrate into network systems, allowing reliable and always accessible monitoring via app. The integrated audio with **ambient listening** function detects sounds and voices, providing a more comprehensive view of security. Easy to install, they adapt to any home environment. The Easydom Eye Smart range is compatible and can be integrated with the Easydom Eye Pro series and Easydom Eye NVRs, for a **complete video surveillance system** that can be managed from a single platform.

Easydom Eye Pro

EYE BULLET METAL

The Eye Bullet Metal camera combines professional performance and maximum reliability in any environment, both indoors and outdoors. Its IP66-certified metal body makes it weatherproof and impact-resistant, ensuring constant protection over time.

Thanks to its PoE power supply and high-definition CMOS sensor, it offers clear, detailed images with dual-light illumination and night vision up to 15 meters.

Integrated AI functions – such as facial and humanoid detection and intelligent alarm management – allow for accurate control and reduce false alarms.

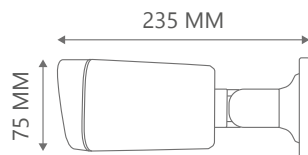

The system is completed by 2D/3D noise reduction, ambient listening, and ONVIF compatibility for simple and universal integration.

Available in 4MP and 8MP versions, with 2.8mm or 3.6mm lenses.

Dimensions: 180x60x68 mm
Weight: 306 g

EYE BULLET MULTIFOCAL

The Eye Bullet Multifocal 8MP multifocal camera offers ultra-high resolution images and precise scene control thanks to its 2.8–12 mm variable lens with manual zoom. Designed for indoor and outdoor use, it features a waterproof and vandal-proof IP66 metal body.

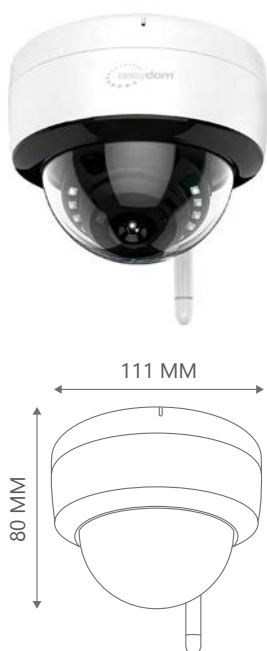

Dual-light illumination with 8 LEDs allows color vision even at night up to 40 meters, with automatic IR-CUT for day/night management. Advanced AI functions – including Face Detection, Human Detection, and alarm management – ensure intelligent monitoring, while H.265+ compression optimizes storage without loss of quality.

A professional, compact, high-performance solution for clear security, even in the dark.

Dimensions: 235x75x70 mm
Weight: 450 g

EYE DOME METAL WI-FI

The Eye Dome Metal Wi-Fi camera combines compact design and advanced technology to provide reliable video surveillance in indoor or outdoor environments.

The IP66 metal body provides protection from water and impact, while the 12 IR SMD LEDs ensure clear night vision up to 10 meters, with automatic day/night switching via IR-CUT filter.

Intelligent AI functions, such as facial detection, Human Detection, and alarm management, increase control effectiveness.

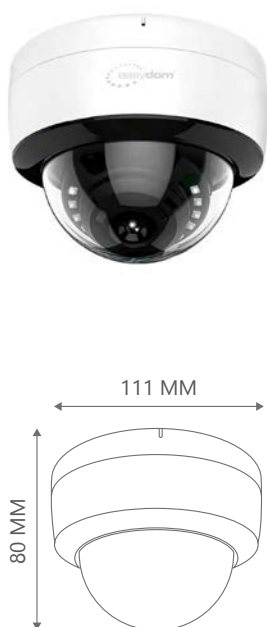

With 2.4 GHz Wi-Fi or wired LAN connection, two-way audio, and the option of recording to NVR or Micro SD up to 128GB, it is a versatile, easy-to-install solution that is perfect for any environment.

Available with 5MP resolution and 2.8 mm or 3.6 mm lenses.

Dimensions: Ø 111×90 mm
Weight: 350 g

EYE DOME METAL

The Eye Dome Metal camera, thanks to its IP66-certified metal body, which is water-resistant and shock-resistant, is suitable for indoor and outdoor use. It guarantees clear night vision up to 15 m thanks to 12 Ø5 mm IR LEDs and an IR-CUT filter with automatic day/night switching.

Equipped with a CMOS sensor and H.265/H.265+ video compression, it ensures high-quality images with optimized use of bandwidth and storage space.

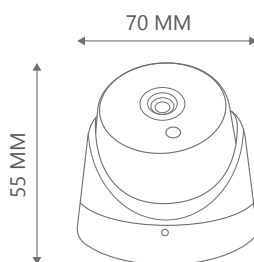

Integrated AI functions, such as Face Detection, Human Detection, and alarm management, improve security and reduce false alarms. Its features are rounded off by two-way audio with a built-in microphone, 2D/3D noise reduction, and ONVIF compatibility for universal integration into IP surveillance systems.

Available in 4MP and 8MP versions, with 2.8mm or 3.6mm lenses.

Dimensions: Ø 111×90 mm
Weight: 350 g

EYE BULLET METAL

The Eye Mini Dome Metal camera combines compact design and professional durability, with a waterproof and vandal-proof IP66 metal body. Equipped with 48 IR LEDs and automatic IR-CUT, it guarantees night vision up to 15m. Integrated AI functions include facial and humanoid detection and alarm management, while 2D/3D noise reduction and ambient listening ensure comprehensive monitoring.

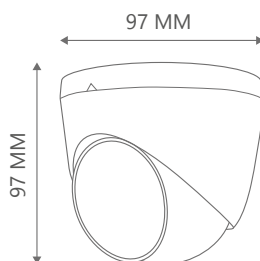

ONVIF-compatible and powered by 48V PoE, it is a versatile and reliable solution for any indoor or outdoor environment.

Available in 4MP and 8MP versions, with 2.8mm or 3.6mm lenses.

Dimensions: Ø 70x55 mm
Weight: 280 g

EYE DOME LITE

The Eye Dome Lite camera is ideal for indoor environments, offering clear images even in low light conditions thanks to starlight/black light technology. Day/night vision with IR + Full Color and 6 dual-light LEDs ensures clear details up to 10 m.

AI functions include facial and humanoid detection and alarm management, while 2D/3D noise reduction and digital WDR optimize image quality.

Equipped with two-way audio (G.711) and a 10/100M RJ45 network interface with RTSP/FTP/DHCP/NTP/UPnP support, it is ONVIF compatible for easy and versatile integration.

Available in 4MP and 8MP versions, with 2.8mm or 3.6mm lenses.

Dimensions: Ø 97x97 mm
Weight: 250 g

Easydom Eye Smart

EYE INDOOR WI-FI

The Eye Indoor Wi-Fi camera is designed for indoor use, with a compact plastic body and 2.4 GHz Wi-Fi connection without the need for LAN.

It offers full color day and night vision with infrared up to 5 m and 355° horizontal and 90° vertical pan/tilt movement for complete monitoring of the environment.

Equipped with a CMOS sensor and H.265 video compression, it supports AI functions such as facial and humanoid detection and alarm management, as well as 2D/3D noise reduction and ambient listening.

Storage is possible on NVR or Micro SD up to 128GB, with 4MP resolution and 3.6mm lens, ensuring sharp and detailed images.

ONVIF compatible, it is a versatile and easy-to-install solution.

Dimensions: Ø 70×105 mm
Weight: 350 g

EYE DISPLAY INDOOR WI-FI

The Eye Dome Display Indoor Wi-Fi is a Wi-Fi dome camera with display that combines technology and practicality in a single compact device, ideal for indoor use.

Equipped with a built-in 2.8" IPS HD screen, it allows one-touch video calling with direct and fast communication.

The Wi-Fi connection with Bluetooth configuration ensures simple and immediate installation. With 355° horizontal and 90° vertical pan/tilt, infrared night vision, and H.265 compression, it guarantees smooth, high-quality images. AI facial and humanoid detection functions, along with two-way audio and recording on NVR or Micro SD up to 128GB, make it a complete and intelligent solution for home or office security.

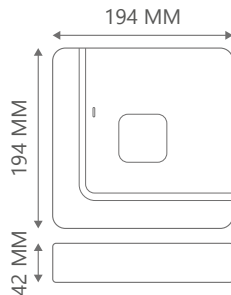

2MP resolution and 3.6mm lens.

Dimensions: Ø 85x174 mm
Weight: 240 g

Easydom Eye NVR

NVR MINI

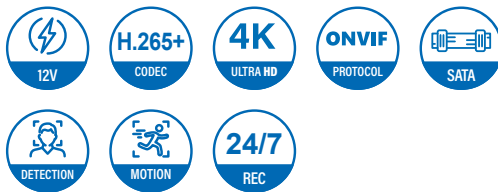

The Easydom Eye MINI 4K NVR is a compact and powerful solution for managing IP video surveillance systems.

It supports video streams up to 4K and offers simultaneous HDMI and VGA outputs, ensuring sharp images and smooth playback on any screen.

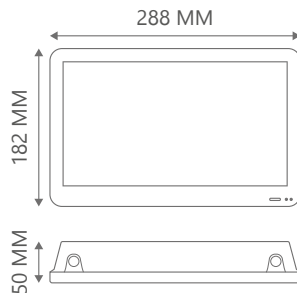

Thanks to H.265+ compression, it optimizes storage space while maintaining high video quality, while 1xSATA HDD support up to 14TB allows for continuous 24/7 recording in total security.

It integrates smart features such as face, motion, and human presence detection, adapting to different monitoring needs. With an intuitive graphical interface, flexible configurations of up to 36 channels, and ONVIF compatibility, it is the ideal choice for home or professional installations.

Dimensions: 194x194x42 mm
Weight: 800 g

NVR ALL-IN-ONE

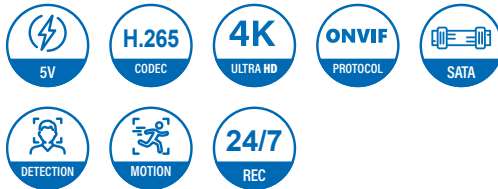

The A-IN-ONE NVR with integrated 11.6" display is a complete, ready-to-use solution for IP video surveillance management.

The high-definition TFT EDP display allows you to view camera images in real time without the need for external monitors. It supports resolutions up to 8MP (4K) for preview, recording, and playback, with H.265 compression for efficient storage management.

It has 8 integrated PoE ports plus 2 network channels for a total of 10 cameras, providing power and data transmission via a single cable up to 250 meters.

It integrates intelligent recording functions, including search by event, time, or face, and supports 1xSATA HDD up to 14TB for continuous 24/7 recording.

With two-way audio and ONVIF/RTSP compatibility, it is a versatile and professional solution.

Dimensions: 288x182x50 mm
Weight: 810 g (senza HDD)
