DESIGN

The Stark residential series declined in its 3 materials aluminum, technopolymer and glass

SIMPLICITY

Interact with the system efficiently and intuitively through AI

THE EASYDOM STARK SOLUTION

REMOTELY

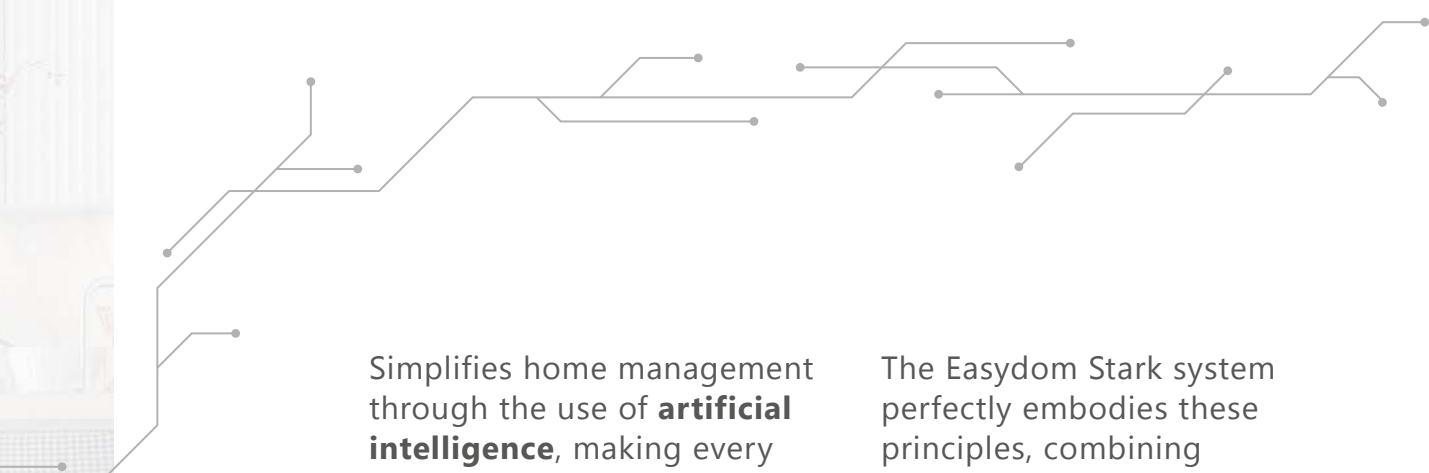

Access via **App**, available for iOS and Android, wherever you are

AT HOME

With **View displays**, every interaction is direct and complete with a single click

A series of thin, grey, stylized circuit lines with small circular nodes at various points, extending horizontally across the upper middle section of the page.

The **Easydom** **Stark** Solution

A series of thin, grey, stylized circuit lines with small circular nodes, extending vertically down the left margin of the page.

Simplifies home management through the use of **artificial intelligence**, making every interaction more intuitive and efficient.

Stark: a system that **redefines** the concept of the connected home

Easydom represents the cutting edge in home technology and beyond, offering solutions that facilitate its management through **intelligent and intuitive systems**.

The Easydom Stark system perfectly embodies these principles, combining **advanced design** with **unprecedented ease of programming**.

Technological innovation, and the refined design of Stark, create a sophisticated, modern environment in which **comfort, safety and beauty coexist in perfect harmony** to create technological environments that respect ease of use.

A series of thin, grey, stylized circuit lines with small circular nodes, extending horizontally across the lower middle section of the page.

Design

THE EASYDOM STARK SOLUTION

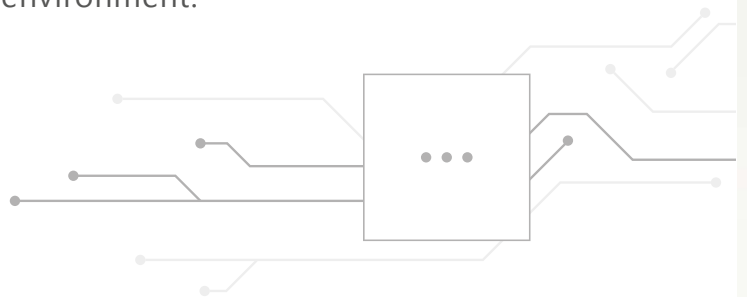

Make smart your home
with AI. **Be Stark.**

Stark redefines **design and technological efficiency** through innovative plates, smart switches and connected objects.

Fully integrated into the Easydom ecosystem, Stark integrates third-party products and becomes the **access point for all connected devices** in the home.

Stark: a smart world for your home that **turns every simple gesture into an interactive action**

The home is transformed into an extraordinarily connected space, where **Easydom's innovative technology** and **Stark's refined design** create a sophisticated and modern environment.

The first home automation system that **truly simplifies** the electrical system

Easydom Stark is not just a residential series, but an **advanced technological solution** that allows you to transform your home into a smart home.

Easydom Stark makes smart installation simple and efficient, significantly reducing the number of cables, pipes and masonry work, **significantly lowering the cost of the electrical system.**

No Bus cables to wire and no actuator modules in panels and boxes.

With a single light point, you can easily **manage multiple controls** with this innovative solution.

ADVANCED COMMUNICATION VIA ZIGBEE PROTOCOL

Easydom Stark is at the forefront of communication thanks to Zigbee, a **standard protocol** in the technological landscape, which enables the creation of a **reliable and highly efficient wireless network** that connects all smart devices. Easydom Stark ensures **stable and fast communication**, enabling precise and reliable control in any environment.

A technology that uses a “mesh” network to enable devices to dynamically create effective communication, ensuring stability and constant monitoring of interactions within the network.

Modular
innovation
with **Stark**
Wall Boxes

...

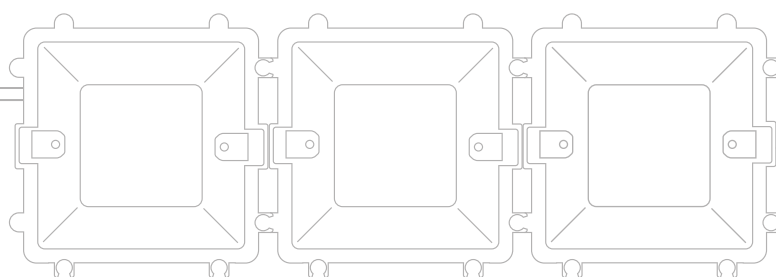

Stark Series Q

Exceptional **Innovation** in its square design

The Stark Q Series represent the **evolution of design and technology** in the field of electrical switches. With a modern, minimalist square shape, these solutions combine cutting-edge aesthetics and functionality.

Stark Q Series switches feature **fully customizable backlighting**. From hourly programming to complete deactivation, to create fully dimmed environments when needed.

Stark Q Series are also designed to be installed in **Stark Wall Box** recessed boxes, which are easily modular in a variety of configurations, both vertical and horizontal. The boxes can fit together quickly and easily, allowing the creation of versatile compositions adaptable to any need. For **precise modular installation**, **Stark Support Frames** are available for 2, 3 or 4 elements.

Aluminum, technopolymer and glass: **three materials**, one excellence

The Stark Q Series is available in three lines, each with a perfect balance of aesthetics, technology and functionality.

Stark QM, made of aluminum, offers strength and lightness with a modern and essential design, ideal for refined and durable environments.

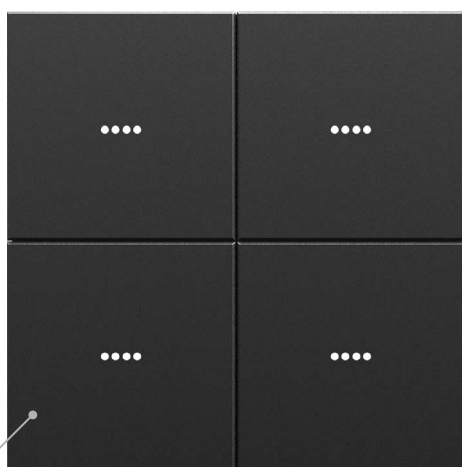

Stark QP, in technopolymer, provides versatility and strength, with white or black finish suitable for classic and modern settings. Its innovative structure ensures durability and practicality, perfect for dynamic environments.

Stark QG, in glass, gives brightness and lightness, creating plays of light that enhance any space. Its sophisticated and minimalist design integrates perfectly into contemporary environments. Three advanced solutions that combine **innovation, durability and style**.

*An answer
to every
aesthetic and
functional need*

...

High-quality materials ensure **excellent performance** and **exclusive design** for a product without compromise

The Easydom Stark Rotary Thermostat

The Stark Q thermostat offers **advanced control of indoor temperatures**, allowing you to precisely manage your home climate.

Style and convenience are the common denominator of the Stark thermostat. Fully manageable either from the LCD monitor on the device itself or remotely.

You can manage **3 modes: cooling, heating and ventilation**. In addition, the fan can be adjusted to 3 speeds: high, medium, low or automatic, a feature that selects the best speed depending on environmental conditions to ensure maximum thermal comfort.

Maximum precision and elegance for the **best thermal comfort**

Thanks to the **360° backlit rotary switch**, you can enjoy maximum precision in controlling thermal comfort.

When the thermostat is activated to reach the desired temperature, the base of the selector switch lights up with a slight red light, indicating the start of the heating process.

This function provides **immediate visual feedback** on the operational status of the device.

*Maximum
precision with
the rotary
switch*

...

STARK Q **ROTARY RING:** CUSTOM-MADE BRIGHTNESS

The Stark Q rotary dimmer connects easily **to dim any type of dimmable light.**

Rooms can be illuminated with LED strips and lamps, transforming any atmosphere with the dedicated driver at hand. **Complete customization of lighting** brings a unique and welcoming space to life.

The Easydom Stark Digital Thermostat

The Easydom Stark digital thermostat is designed to provide **precise and efficient temperature control**.

With multiple advanced features and management both through the touch controller and remotely via the Easydom app, the Easydom Stark digital thermostat offers **ease of use and adaptability** to any lifestyle.

The Easydom Stark digital thermostat manages **three different modes**: cooling, heating and ventilation.

The fan can be adjusted to **three speeds** (high, medium, low) or to an automatic, which adapts the speed to environmental conditions for optimal comfort.

The high level of accuracy in temperature sensing allows **optimal regulation** of heating and air conditioning systems in any room, ensuring a comfortable climate at all times and optimizing energy efficiency.

Smart control
for **tailored
comfort**

*Precise and
efficient
temperature
control*

...

Through the Easydom app, you can also set the **hourly schedule** you want based on your daily needs.

When the thermostat is not in use, the screen's **LED backlighting** goes into stand-by mode, leaving only the controls visible through a soft light, so as to ensure maximum comfort during nighttime hours.

A decorative graphic on the left side of the page. It features a vertical line with several horizontal and diagonal segments, resembling a circuit board trace. At the top left, there is a small image of a green plant with long, thin leaves.

Simplicity

THE EASYDOM STARK SOLUTION

Easydom Tess: a small gateway for **Big Functions**

Easydom Tess is the gateway designed to **manage communication** between Easydom Stark line products and all compatible devices. A single gateway that allows you to manage and control **all connected devices**, combining the functions of your favorite products.

Based on the **Linux operating system**, Tess guarantees stability and security and makes the management of connected objects efficient thanks to the **Easydom interface**, which is always simple and intuitive in both programming and use. An intelligent gateway that unites and coordinates the functions of all integrated devices. **So many integrations are available**, making it easy for all devices to cooperate with each other.

A light gray rectangular box with rounded corners, representing the Easydom Tess gateway. It is connected to a network of circuit lines that extend across the bottom of the page.

*Easydom Tess:
little giant of
versatility*

At Home

THE EASYDOM STARK SOLUTION

Easydom View: the display that **revolutionizes interaction** with the smart world

The innovative interactive display designed to **simplify the management** of any environment and to adapt perfectly to any living requirement. Available in two sizes, 4" and 10", the View is the **perfect original solution** that provides optimal, smart control in any setting.

View 4" and View 10" work together with **Easydom Tess**, the operational heart of the entire system that acts as a communication gateway.

For installation, the **Stark Wall Box** recessed box is used, which ensures quick and non-invasive installation.

View 4" and View 10" are **regularly updated** ensuring constant access to new technologies and integrations.

*View and
Tess for a
technologically
advanced home*

View 4": maximum efficiency, minimum space, more elegance

With its optimized user interface, one can easily **control and monitor** temperatures, lights, motors, video intercom, and the entire Easydom system, as well as view energy consumption and cameras, activate customized scenarios, and make hourly schedules with ease and accuracy.

This small screen can be **easily integrated** into the Easydom Stark Q residential series, offering aesthetic and functional synergy with the other devices in the range.

Its **small size** allows discreet and flexible installation in a variety of environments, adapting perfectly to any space without compromising the control and monitoring capabilities of the home automation system.

Equipped with an **interface designed specifically for its small size**, the View 4" allows users to manage various functions with ease.

View 4", the **compact** display for **efficient home automation** management

YES! IT IS ALSO A VIDEO INTERCOM

The View 4" can also be used as an **indoor station of the video door phone**, with quick access buttons allowing instant interaction

SURE! YOU CAN MONITOR CONSUMPTION

With graphics adapted to the small size, you can **monitor consumption instantly** or access the data history.

SMALL? 4 INCHES OF EFFICIENCY

With graphics adapted to the size of the display, every control button is easily accessible. Every function is handled **quickly and easily**.

Specially designed interface with its mini display

OBVIOUS! WITH A GESTURE YOU SET THE THERMOSTAT

In such a small touch space, even the temperature is set quickly thanks to the **circular slide** that mimics the rotary control of the thermostat.

View 10": wide viewing, comprehensive and comfortable handling

For those seeking an even **more immersive experience**, the 10-inch View is the ideal choice.

A larger display for **more defined monitoring**

View 10" is an interactive display for managing the Easydom home automation system with an interface designed to provide an **immersive and intuitive experience**.

With its large display area, View 10" allows you to use the Easydom app **in plan view mode**: intuitive and complete access to all system functions such as lights, automations, temperatures, scenarios, cameras, security and consumption.

All consumption at the click of a button

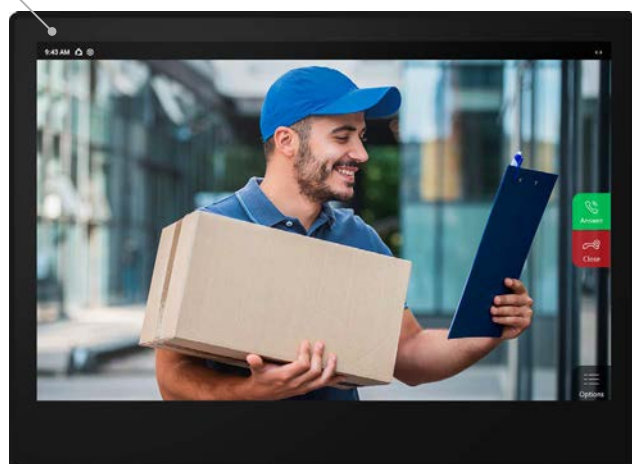

CONSUMPTION

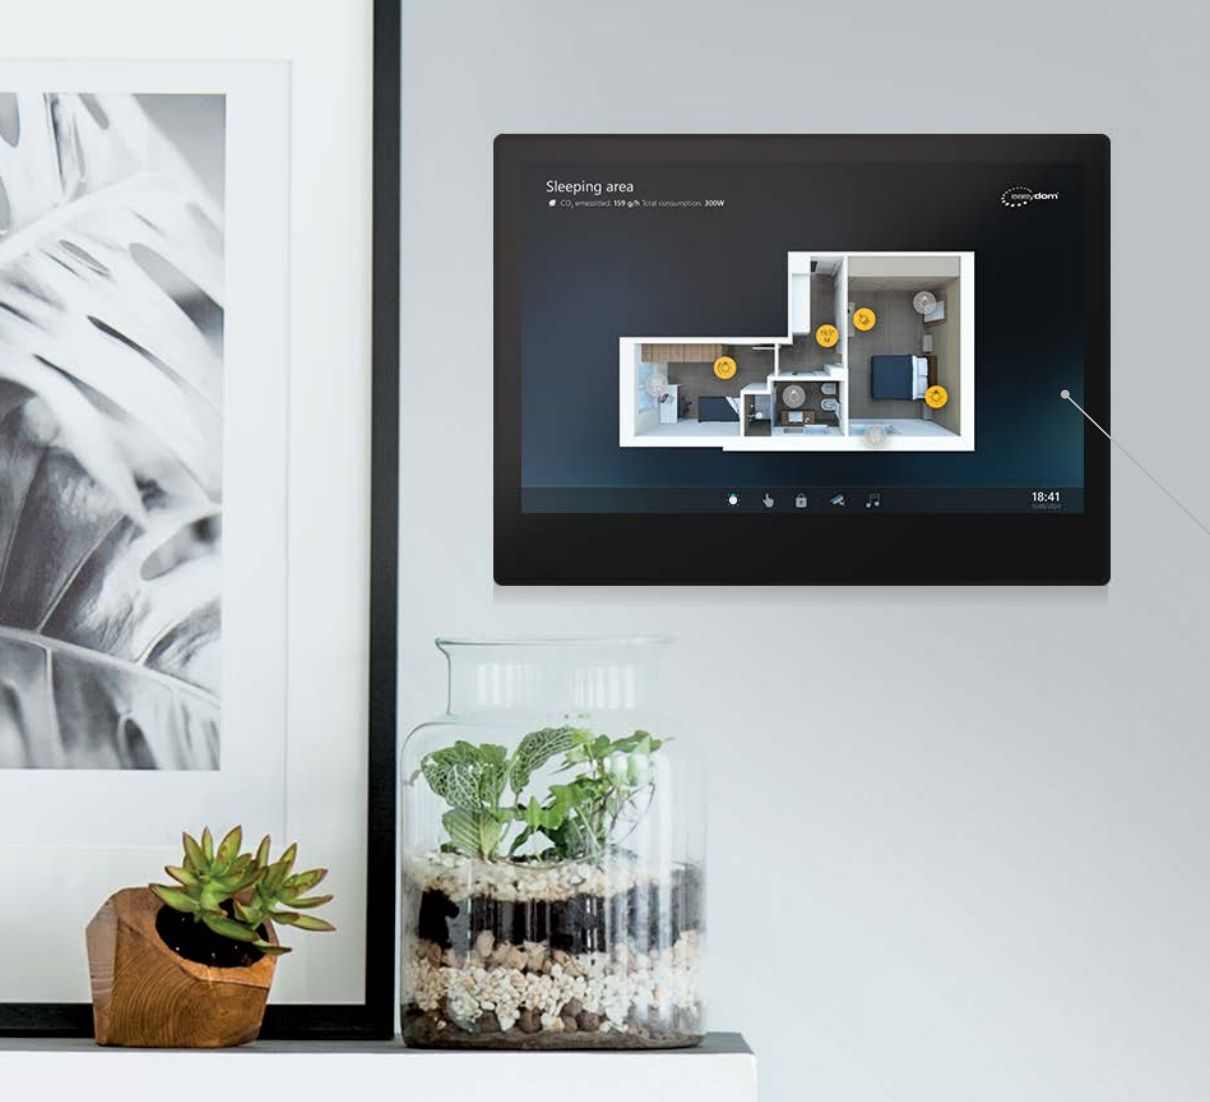

Having constant and complete monitoring of consumption helps to **optimize and save money**. The View 10" gives a complete view of the energy being consumed and the related costs.

VIDEOINTERCOM

Full view of calls from the View 10" through the interface with direct access to the gate opening and closing buttons.

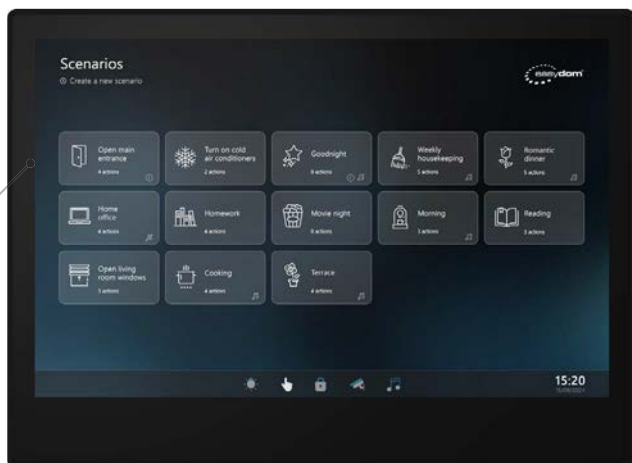

EASYDOM INTERFACE: **CONTINUOUSLY EVOLVING** WITH ENHANCED FUNCTIONS FOR SMARTER CONTROL

Optimized for the View and redesigned to be increasingly simple and accessible via App as well, the Easydom interface makes it possible to have a home automation system that is not only fully customizable to individual needs, but **truly intelligent** because it can communicate with the home and learn new functions from habits.

Easydom integrates within it an **automatic search for smart devices** found in the home.

A real search engine within the home network that can recognize compatible devices and manage them directly and solely from a single software.

*A truly
intelligent
home
automation
system*

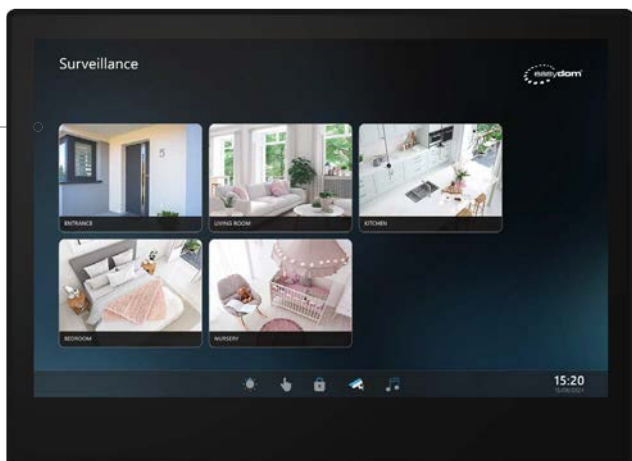

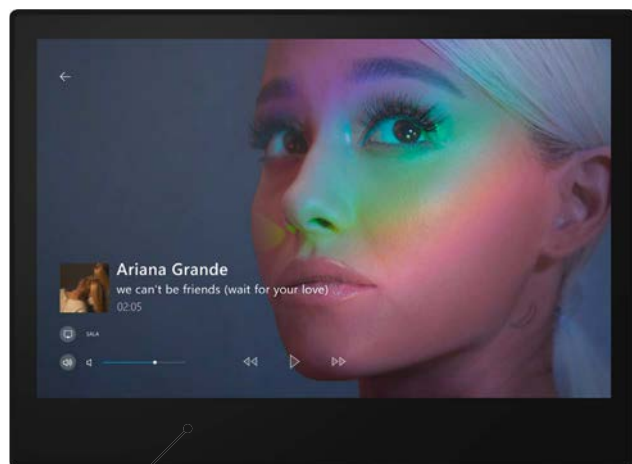

SCENARIOS

Easily, a scenario can be brought to life by associating actions and favorite music to recreate the desired atmosphere. Like each control, **each scenario is also programmable** to ensure unprecedented comfort.

MUSIC

A music player seamlessly integrated into the system with a dynamic GUI through which you can **manage integrated streaming services** such as Spotify.

Music can be associated with the scenarios, allowing favorite songs, playlists or radio stations to be played in any room.

VIDEO MONITORING

Through Easydom, cameras can be controlled from any device and a **snapshot can be taken** to save it in the image archive. Images can be resized and a slideshow of the cameras can be activated for constant monitoring.

Remotely

THE EASYDOM STARK SOLUTION

Manage your home from **anywhere**

With an **Easydom Live** subscription, access to the Easydom system from any internet connected mobile device is instant and secure.

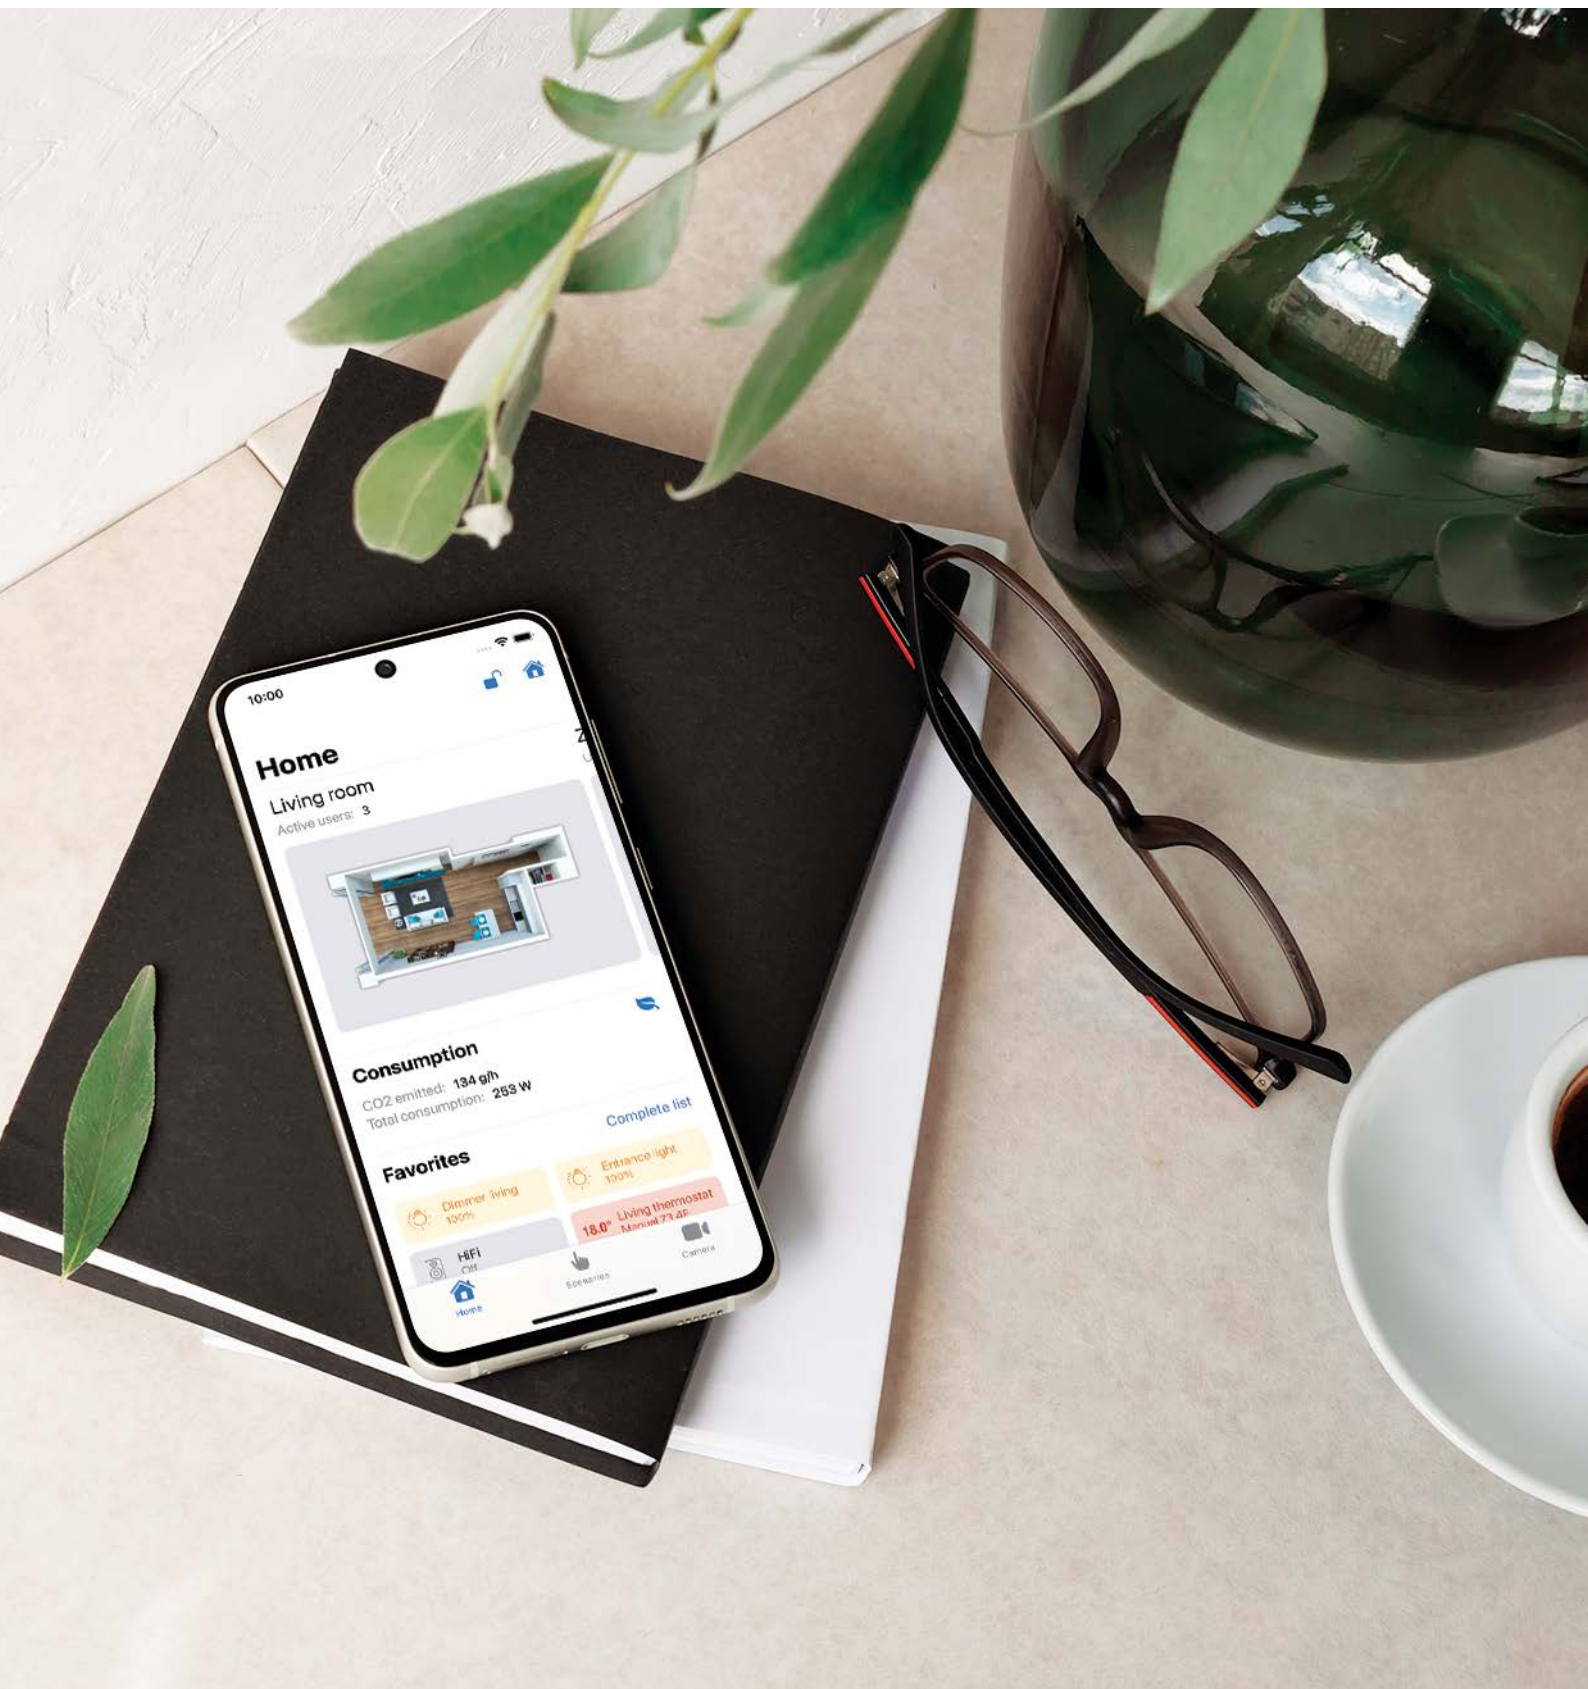

A **remote** and **certified** access

No matter how you connect to the system, it will happen **safely and securely** every time. In fact, Easydom Live runs through certified servers on the Microsoft Azure platform.

But that's not all: with the **Microsoft Account** connected, all you have to do is enter the credentials in the iOS or Android app to start automatic synchronization with the Easydom system.

Easydom Live also enables advanced video intercom features, as well as activating an **online console** accessible from any browser wherever you are.

*Manage your
home automation
system wherever
you are with the
Easydom app*

With the Easydom app, your home is **always** **with you**

The Easydom App allows you to always have at your fingertips the management of your home, office and any home automation system managed by Easydom, wherever you are.

The Easydom App is the first to offer a complete **plan view of the system**, with the ability to access all information easily and intuitively, thanks to the simple rotation of the device.

With Easydom, security is at your fingertips. In addition to **complete management of the alarm system**, in the camera section you can **monitor your home in real time** and capture photos or videos to share.

With the Easydom App, it is also easy to view **energy consumption** and associated costs, so you can always keep an eye on your energy expenditure and save on your utility bill.

All the functions
you need to **manage**
your home efficiently
and fast

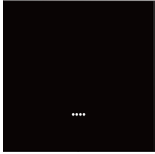

FULL CONTROL **ALWAYS AT YOUR FINGERTIPS**

With the Easydom app, all features of the home are easily managed from Android and iOS devices. You can turn on, turn off, and adjust the intensity of **lights**, control all the motorizations in your home, create **scenarios**, activate them remotely and schedule their time, as well as adjust the **temperature** or air conditioning system intuitively and quickly.

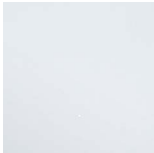

You can also **program** on/off switching of lights and automations, optimizing the comfort and safety of your home.
