

STARK NOK

BY EASYDOM

YOUR VIRTUAL CONCIERGE

Nok is a range of video door entry systems designed to **redefine access control through innovative features** with all the security guaranteed by Easydom.

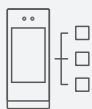

Stark Nok ID

Smart video door phone with **facial recognition**

An elegant panel equipped with a smart camera ready to guarantee **controlled and personalized access**. The high-definition camera captures every detail of the face, analyzing distinctive features in real time. In a matter of seconds, the **facial recognition** software assesses identity by comparing the recorded features with a secure database.

This device is a symbol of **innovation and progress** in the world of home security. The Nok ID video door phone redefines security standards, offering an elegant and intelligent way to control and monitor access, all through security.

SIP PROTOCOL SUPPORT

The system features robust **SIP protocol support**, ensuring communication and integration within modern network infrastructures.

8" IPS DISPLAY

A vivid 8" IPS LCD display provides a **clear and intuitive interface**, enhancing the user experience and facilitating effortless navigation through various features.

HIGH-BRIGHTNESS LED

Ensures **optimal image quality** even in low light conditions, ensuring accurate and reliable facial recognition. Equipped with automatic lighting with high-brightness LEDs

FACIAL RECOGNITION

Supports **multiple face detection** thanks to a wide binocular dynamic range and an infrared camera, combined with a facial recognition algorithm.

UNLOCKING MODES

Supports **9 unlock modes**: codes, RFID card, surveillance/call, facial recognition, QR code, APP, password, facial recognition + public code, facial recognition + RFID card.

ADVANCED SECURITY

Nok ID has been designed with robust encryption protocols and anti-tampering measures to ensure **advanced security**. The intuitive user interface allows for easy control and customization of security settings.

Among the technological innovations for the home that are transforming the way we live,
the video doorbell has evolved considerably.

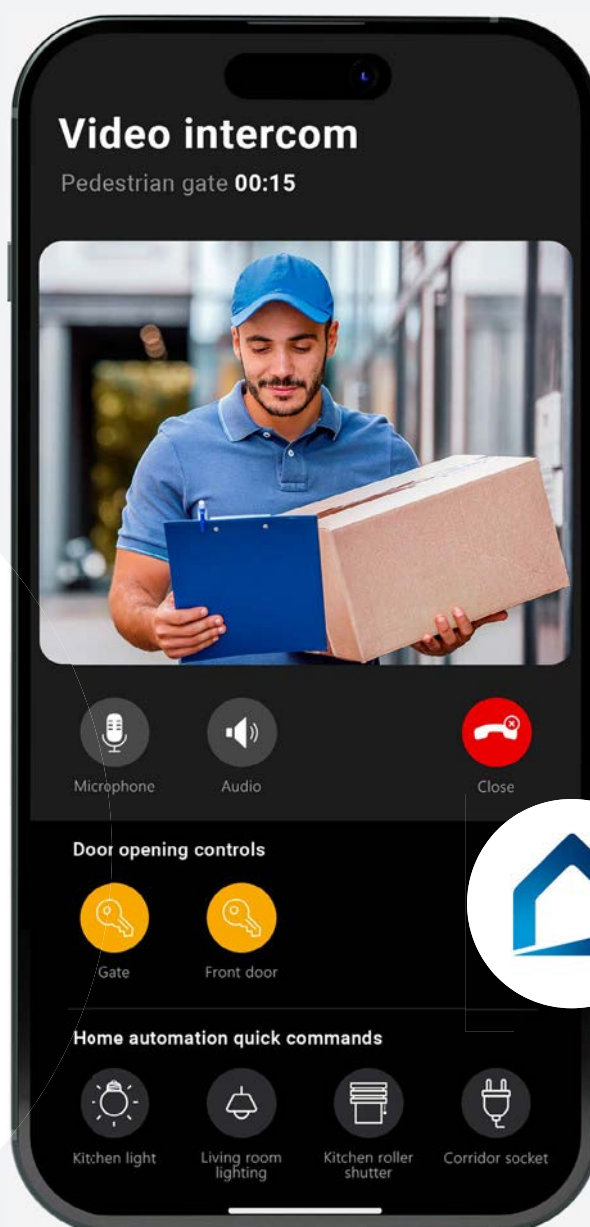

It is no longer just a device for seeing who is knocking at our door, but has become a **real security and smart management system** for our home.

Nok: innovative and **always connected to you**

The Stark Nok video door phone offers innovative remote monitoring functionality thanks to the **Easydom Live** service. This allows users to control and manage the video door phone from anywhere using their smartphone.

Whether you are at work, on vacation, or simply away from home, you can **receive real-time notifications, view visitors, interact** with them, **open** doors or gates if necessary, and access a convenient quick control console for home automation.

Smart and dynamic management that allows you to interact at any time through the Easydom app

Stark Nok ST

Standard solution, **high security**

The Stark Nok ST external video door phone control panel combines elegance and cutting-edge technology in the field of security and access control. The panel surface is made of **high-quality materials**, with clean lines and delicate angles adding a touch of elegance, while LED backlighting emphasizes the **modern character** of the device, creating visibility even in low light conditions.

Stark Nok ST allows users to **access the system using a card**, ensuring security and convenience and eliminating the need for keys or codes. A cutting-edge solution for those looking for reliable access control with a modern design and intuitive interface.

SIP PROTOCOL SUPPORT

The system features robust **SIP protocol support**, ensuring efficient communication and seamless integration into modern network infrastructures.

IC CARD SUPPORT

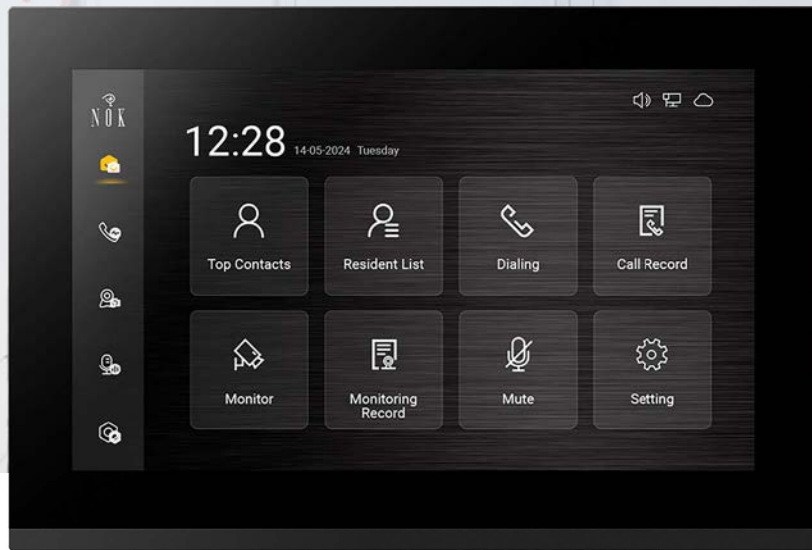

The integrated circuit system provides a fast, efficient, and secure authentication method: simply hold the **IC card** programmed with specific access information close to NOK ST and the device will securely authorize access.

CUSTOMIZABLE VIEW

The 2MP camera ensures clear images with a wide 95° angle, providing a **broad view**. Adjustable by 12° in all directions, the camera offers maximum versatility in customizing the perspective.

Stark Nok IM

Indoor video door phone with **a refined design**

Stark Nok IM, the ideal indoor video door phone for those seeking an advanced video door phone experience, combining **sophisticated aesthetics and cutting-edge functionality**. The 7" touch screen offers a completely new and fluid visual experience of the video door phone system, and its modern and elegant design blends perfectly with the surrounding environment, adding a touch of cutting-edge style.

The user interface is designed to ensure **simple and intuitive use**, facilitating access to the device's various features. Calls can also be managed remotely through the dedicated app, adding an element of innovation and advanced interaction.

INTERNAL VOICE INTERCOM

A voice intercom is supported between residents of the same community and other internal monitors in the same apartment, facilitating **internal communication**.

WALLPAPERS AND SCREENSAVERS

You can customize the visual experience with tailor-made **wallpapers and screensavers**, making the device a unique extension of your style and taste.

REMOTE RESPONSE

Thanks to the **Easydom Live** service and Nok IM compatibility, you can answer the video doorbell and open your home directly from your mobile phone, wherever you are.

CALL AND MESSAGE LOG

Automatically answers missed calls, managing access efficiently. Plays back local recordings and records visitors' voice messages for **detailed monitoring**.

REAL-TIME SURVEILLANCE

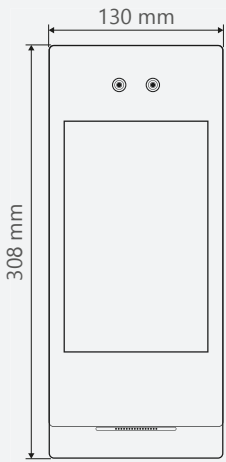

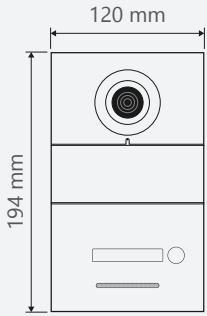

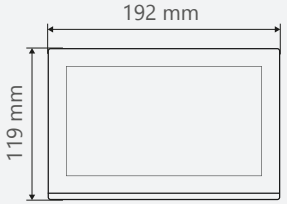

Provides **support for real-time surveillance** of the external station by integrating an IP camera. This feature allows you to simultaneously monitor different areas inside the apartment.

ADVANCED COMMUNICATION

Provides advanced support for video chats between residents and visitors or security units. This feature facilitates **direct and immediate** communication, improving accessibility and security within the community.

DIMENSIONS AND TECHNICAL SPECIFICATIONS

STARK NOK ID	STARK NOK ST	STARK NOK IM
		
Dimensions: 130mm x 308mm x 26.5mm RAM: 512 MB Memory: 4 GB Display: LCD 8" display with resolution: 800 x 1280 Operating temperature: -20°C to +70°C Operating voltage: DC 18 ~ 30 V Operating current: < 400 mA CMOS camera type and 2MP resolution Focal length: 4.3mm Supports SIP protocol Automatic fill light with high brightness LEDs NIR (Near Infrared) camera in combination with wide dynamic range binocular vision recognizes multiple faces, verifies whether a person is real or wearing a mask, offering advanced security features even in variable lighting conditions.
